

Team 7 : Contribution File until 4/30

Tasks	Team member name
Byte code file generation for assignment, variable and display	Smita
Byte code file generation for arithmetic operations	Smita
Testing and checking the code generated for boundry functions	Ruthvik
Writing sample programs for validation	Ruthvik
Stack mahcine model implementation	Nishant
Generating runtime for basic operations	Susmitha
Understanding and Synchronization of runtime and intermediate code	Susmitha
Generating runtime for arithmetic and logical operations	Nishant
Improving the complier code	Smita
Byte code file generation for logical operations	Ruthvik
Generating byte code for if and while loop	Smita
Evaluating and improving the complier code based on sample programs	Ruthvik
Making changes in grammar file to handle comments and String datatype	Smita
Creating sample programs	Susmitha
Modifying runtime code to support nested if	Nishant
Making the presentation	Smita
Project Build to execute from command line	Ruthvik
